

**FORESTER 315W CMH
GROW LIGHT
INSTRUCTION MANUAL**

INSTALLATION AND SET UP

The all in one Hortitek® Forester 315W CMH Grow Light can be set up in only a few steps.

1. Using the built-in hanging tabs, attach the included Vee hangers and hang the Grow Light in a dry, well-ventilated area that is free from dust and dirt.
2. Ensure lamp is secured in the lamp holder.
3. Connect the unit to a suitable power source and turn the switch on.
4. Start gardening!

IMPORTANT NOTES

- Only use this unit with lamps of the same type and power rating as printed on the housing.
- Only connect this unit to the power source for which it was designed. This information is printed on the housing.

SAFETY PRECAUTIONS

- Do not power on the unit without having securely connected the lamp in the holder.
- When powering on the unit, ensure that the lamp is igniting successfully. If it fails to ignite, turn the power off immediately and inspect the lamp for signs of incorrect fit or damage. If the lamp is fitted well and without defects, return to place of purchase.
- Never place unit on ground when connected to power and switched on.
- To avoid failure, do not obstruct the ventilation points.
- The unit should be operated in a dry, well-ventilated, dust-free area.
- Suitable for indoor use only.
- Do not carry the unit by the power lead.
- Ensure all power lead connections are secure and that all cables are positioned safely.
- Do not attempt to open, rewire or reconfigure this unit. This will void the warranty and may cause serious injury or death.
